

In high-risk environments, the gap between what has already happened and what is developing is where incidents occur. Most intelligence platforms report the past. Foresight foresees the future.

Built by maritime security professionals who operate in these waters, Foresight is built around a single question: how does an experienced maritime security professional actually assess a threat? Every source is rated. Every signal is weighed. Every output is designed to support a decision, not just inform one.

This is maritime intelligence at a different standard.

HAND-PICKED INTELLIGENCE SOURCES

Selected, tested, and rated by HRM's security experts based on years of operational experience.

- Official maritime advisories
- Global and regional news services
- Verified open-source intelligence channels, including real-time encrypted communications networks used by professionals operating in active threat environments
- Predictive market signals

Each source carries an **HRM Trust Score**, a proprietary credibility rating reflecting proven accuracy, timeliness, and corroboration.

EXPERT STANDARD. AI SCALE.

Signals cross-referenced across sources, patterns and anomalies identified, credibility weighed before any assessment is formed. Every output includes:

Risk Level

HRM Confidence Rating

Key Findings

HRM Recommended Actions

The Human Behind the Intelligence

Every output reflects real operational experience in high-risk environments.

HRM Confidence Rating

Source quality, corroboration, and timeliness. The difference between intelligence and noise.

HRM Recommended Actions

Not what happened, but what to do next.

INTELLIGENCE YOU ACT ON

Maritime Intelligence Brief

Structured report covering your selected areas of operation. Executive summary, key findings, risk level, HRM Confidence Rating, and recommended actions.

Interactive Geospatial Risk Map

Live map of current risk levels, incident markers, and route overlays, updated continuously.

Predictive Intelligence

Risk forecasts covering short-term (1–5 day) and medium-term (2–3 week) horizons.

Route Analysis

On-demand assessment of a specific voyage plan against current threat intelligence.

Ask Foresight

Your direct line to on-demand intelligence. Any question, any time.

Escalating Threat Alert

Issued when a situation is deteriorating and warrants close monitoring.

Critical Threat Alert

Issued when immediate action is required. Pushed directly to subscribers without delay.

Geo-Fencing Alerts

Triggered when risk in a defined area crosses a set threshold.

HRM Expert Commentary

Operational context added by HRM analysts at every critical threshold.

For any question you have. Ask Foresight.

Ask any question. Get an immediate answer, drawn from verified sources and assessed to expert standard.

THE BUSINESS CASE

A SINGLE AVOIDED INCIDENT RETURNS THE ANNUAL SUBSCRIPTION COST MANY TIMES OVER.

Vessel Deviation

An unplanned VLCC diversion costs USD 700K–1.2M. Advance intelligence turns a crisis into a planned decision.

01

War-Risk Premiums

Evidenced due diligence is an increasingly recognised factor in premium negotiation. Foresight briefs provide exactly this standard.

02

Crew Safety

KFR exposure in the Gulf of Guinea averages USD 1–4M plus 30–90 days detention. Early-warning intelligence is the highest-leverage mitigation available.

03

ISPS Compliance

Foresight provides the documented threat assessment baseline required under ISPS Code obligations.

04

THE HRM DIFFERENCE - WE ALWAYS HAVE YOU COVERED

Continuous OSINT intelligence, expertly assessed and delivered before threats materialise, so your team is always aware and always prepared.

**AHEAD OF
EVERY THREAT
ALWAYS.**
